EXPERIENCE

Data Services – WashU Libraries

Saint Louis, MO

Student Data Visualization Assistant

February 2025 – Present

- Support 3D visualization research by assisting users and staff with 3D capture, scene development, and AR/VR tools
- Assist in documenting workflows and developing guides to enhance user accessibility and understanding of visualization tools
- Provide technical support for the AVA studio and collaborate with the 3D Visualization Specialist to improve workflows

NYC Tourism + Convention

New York, NY

Generative AI Specialist, Intern

July 2024 – August 2024

- Created the first draft of the company policy for AI integration and compliance
- Developed custom HTML email templates and brand language GPTs using OpenAI, streamlining in-house marketing operations and reducing content turnaround time by approximately 30%.

PROJECTS

WashU Campus Creamery Rewards App - Figma, React Native, TypeScript

Google Developer Groups, Designer and Developer

- Utilized Figma for prototyping and applied user-centered design principles to optimize the mobile experience
- Prototyped and developed responsive front-end interfaces using React Native and TypeScript for the campus ice cream shop's loyalty program app, which serves approximately 2000 students

Crave: A Recipe Recommender for Students on a Budget – HTML, CSS, JavaScript, Python, SQLite

SEO Tech Developer, Designer, and Developer

- Designed and built responsive front-end interfaces with HTML, CSS, and JavaScript, enabling users to customize preferences and view recipe suggestions powered by the OpenAI, Tasty, and Google Places APIs
- Created interactive prototypes and wireframes to streamline the meal recommendation flow

LEADERSHIP & PROFESSIONAL DEVELOPMENT

SEO Tech Developer

New York, NY

Intern

June 2025 – Present

- Built an end-to-end group project using APIs with authorization, unit testing, and database integration, serving as Scrum Master to coordinate team workflow and sprint planning.
- Received mentorship from SEO coaches to enhance site architecture, technical performance, and search engine visibility.

Management Leadership for Tomorrow

New York, NY

Career Preparation Fellow

January 2025 – Present

- Complete business case studies, software engineering assignments, and interview preparation to grow leadership and technical skills
- Attend conferences with industry leaders, such as Deloitte, LinkedIn, BlackRock, Jane Street, and Adobe

Google Code Next

New York, NY

Code Next Engineer

September 2021 – 2023

- Gained hands-on experience in creative coding, 3D modeling, game design (C#), and web development with a focus on object-oriented and user-centered design.
- Placed 3rd in an internal hackathon with a community safety app and received mentorship from Google engineers on software development best practices.

Other Affiliations: Caribbean-American Student Association, National Society of Black Engineers, McKelvey Build Fellowship

OTHER SKILLS & INTERESTS

Intermediate proficiency in Saint Lucian Creole, Art, Badminton, K-pop, Baking, Photography, and Lego Collector
